Category:	charon		
Target version:	4.1.4		
Resolution:			

Description

Initial support of [<source:trunk/doc/standards/rfc4555.txt> RFC4555].

For the first release with MOBIKE, we target simple roaming of the initiator. This includes MOBIKE support indication, address list exchange and simple address update. The initiator should detect changes in his interface/address list and roam to another address pair if the current gets unusable. This includes roaming from an to NATed situations.

History

#1 - 02.07.2007 16:14 - Martin Willi

- Status changed from New to Closed

- Affected version set to fixed
