

strongSwan - Feature #13

Implement a modular credential framework

31.10.2007 10:44 - Martin Willi

Status: Closed	Start date:
Priority: High	Due date:
Assignee: Martin Willi	Estimated time: 0.00 hour
Category: charon	
Target version: 4.2.0	
Resolution:	
Description	
The current implementation of credentials lacks extensibility and is not flexible enough.	
A new framework should provide:	
<ul style="list-style-type: none">• Additional credential sources (not only ipsec.secrets/ipsec.d*)• Generic handling of private keys, public keys, secrets and credentials (not only x509)	
To allow proper and modular implementation of:	
<ul style="list-style-type: none">• Database credential backend (used for Manager)• Smartcard support• Other crypto systems (ECDSA, ...)• Other certificate systems (PGP)	

History

#1 - 15.02.2008 09:36 - Martin Willi

- Status changed from New to Closed

- Affected version set to fixed
