

strongSwan - Feature #15

Implement reauthentication using RFC4478

31.10.2007 15:26 - Martin Willi

Status: Closed	Start date:
Priority: High	Due date:
Assignee: Martin Willi	Estimated time: 0.00 hour
Category: charon	
Target version: 4.1.9	
Resolution:	
Description Our implementation of reauthentication is incomplete. We currently do reauthentication initiated from both parties. However, the responder can't reauthenticate in many situations (EAP, virtual IP, ...). RFC4478 solves this issues by forcing the client to do the reauthentication.
