

strongSwan - Feature #20

Pluggable fetcher plugins

15.02.2008 09:44 - Martin Willi

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:	Martin Willi	Estimated time:	0.00 hour
Category:	libstrongswan		
Target version:	4.2.0		
Resolution:			
Description			
File fetching is currently done using libcurl. As this dependency should not be a must, we create a fetcher API where fetching modules register themselves. The URI based fetcher should get two plugins in the first run, one for http:// URIs (libcurl) and one for ldap:// URIs (openldap).
