

strongSwan - Bug #2206

while installing /var/www/tnc/django.db is not getting created

03.01.2017 13:26 - Prasad M

Status:	Closed	Start date:	03.01.2017
Priority:	Normal	Due date:	
Assignee:	Andreas Steffen	Estimated time:	0.00 hour
Category:	testing	Resolution:	Fixed
Target version:	5.5.2		
Affected version:	5.5.1		

Description

I have the following system info:
32~14.04.1-Ubuntu SMP Fri Jan 22 15:32:26 UTC 2016 x86_64 x86_64 x86_64 GNU/Linux

While installing the test environment I am facing this error:

[FAIL] Installing from recipe 015_strongTNC.mk

! Command chroot /srv/strongswan-testing/build/loop make SWANVERSION=5.5.1 -C /root/shared/compile -f 015_strongTNC.mk failed, exiting (status 2)
! Check why here /srv/strongswan-testing/build/testing.log

And in the testing.log i got the following error:

```
cp -r strongTNC-master /var/www/tnc && chgrp -R www-data /var/www/tnc && chmod g+w /var/www/tnc /var/www/tnc/django.db
chmod: cannot access '/var/www/tnc/django.db': No such file or directory
015_strongTNC.mk:21: recipe for target 'install' failed
make: *** [install] Error 1
make: Leaving directory '/root/shared/compile'
```

Am attaching the testing.log file for the same. Could you please let help me regarding this how to proceed ?

Regards,
Prasad

- Assignee set to Andreas Steffen

Hi Prasad,

this commit fixes the strongSwan testing problem introduced by changes in the strongTNC package:

<https://wiki.strongswan.org/projects/strongswan/repository/revisions/470e61ae77ba1a957dcc9ce68e7a80a444b86581/diff>
