

strongSwan - Bug #229

strongswan-5.0.0 and git HEAD fail to build when ./configure --enable-ikev1 --disable-ikev2

22.09.2012 15:09 - Anthony Basile

Status:	Closed	Start date:	22.09.2012
Priority:	Normal	Due date:	
Assignee:	Tobias Brunner	Estimated time:	0.00 hour
Category:	libcharon	Resolution:	Fixed
Target version:	5.0.1		
Affected version:	5.0.0		

Description

When configured with IKEv1 but not IKEv2, the libraries charon links against lack symbol ike_auth_lifetime_create which is provided by ike_auth_lifetime.c. This patch makes sure ike_auth_lifetime.c is compiled and linked into libcharon.so.

This was hit in Gentoo. Downstream bug: https://bugs.gentoo.org/show_bug.cgi?id=435614

Associated revisions

Revision 2d39f79b - 25.09.2012 09:31 - Tobias Brunner

IKE_AUTH_LIFETIME task is not defined if IKEv2 is disabled

Fixes #229.
