Description

Please consider enabling EAP-TTLS in the Android client. I would like to use a setup similar to <https://www.strongswan.org/testing/testresults/ikev2/rw-eap-ttls-radius/> in order to keep the user password encrypted between the IPsec responder and the RADIUS server.

History

#1 - 18.04.2018 15:35 - Tobias Brunner

- Category set to android

#2 - 21.06.2018 18:31 - Tobias Brunner

- Status changed from New to Closed

- Assignee set to Tobias Brunner

- Target version set to 5.7.0

- Resolution set to Fixed

The next version of the app will include basic support for EAP-TTLS (and EAP-PEAP).

#3 - 04.07.2018 19:48 - Tobias Brunner

- Status changed from Closed to Feedback

- Target version deleted (5.7.0)

- Resolution deleted (Fixed)

Had to revert that again due to issues with commercial VPN services.
