Resolution: Fixed	
Description Can the Strongswan Android App add a notification tile that can toggle VPN on/off without further confirmation? A notification tile is a function since Android Nougat that allows settings to be toggled like the attached screenshot. Referring to the screenshot, there are toggle buttons on the top that will appear when swiping down from the top of the screen. The tile API documentation can be found here: https://developer.android.com/reference/android/service/quicksettings/Tile.html
