Resolution:	
Description Hi, It would be nice with some more deetails in the Strongswan app when connected to a VPN, for example what the current assigned IP-address is. It would be easier then having to scroll around in the log windows to find it.	

History

- Status changed from New to Feedback

for example what the current assigned IP-address is

I currently don't see a reason for this. What value would that have to the regular user? (or even advanced users)

It would be easier then having to scroll around in the log windows to find it.

As you say it's already available if it's needed desperately for something.

Okey, just used to see it in other VPN clients, but no big deal :)
