Target version:	5.0.2		
Affected version:	5.0.1		

Description

Hi,

When I test IKE rekey in r5.0.1, virtual ip will be deleted at destroying old IKE_SA.

I check inherit method in ike_sa.c and find a bug.
It tries to move virtual ips from new ike_sa to old one.
But actually it should be from old one to new one.
Is it right?

Zhonghai
