

strongSwan - Issue #2867

Starting strongSwan 5.7.1

20.12.2018 15:32 - Louis garcia

Status: Closed	
Priority: Normal	
Assignee: Tobias Brunner	
Category: starter	
Affected version: 5.7.1	Resolution: No feedback
Description Hello everybody ! I am trying to take the Mobile IPv6 HOWTO as an example of configuration but when I run the "ipsec start" command I have just one line as an output (Starting strongSwan 5.7.1 IPsec [starter] ...) then it doesn't show anything else how is shown in the Mobile IPv6 HOWTO (logs informing about the access to some directories to take some files like loading ca certificates). If I can't see these logs I can't know if it works well or not. I thought maybe the log info it isn't shown in the 5.7.1 version but I'm not sure because I have used all the information that I found in the tutorials in this page but I don't know what is the reason.
