

## strongSwan - Issue #3078

### modprobe: unrecognized option: v

31.05.2019 09:27 - Lucian Cristian

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> starter	
<b>Affected version:</b> 5.8.0	<b>Resolution:</b> No change required
<b>Description</b>	
on systems using busybox (OpenWRT) when strongswan starts there are lots of lines printed on output, like	
<pre>modprobe: unrecognized option: v Usage:   modprobe [-q] filename..</pre>	
previously there was a patch <a href="https://github.com/openwrt/packages/blob/master/net/strongswan/patches/201-kmodloader.patch">https://github.com/openwrt/packages/blob/master/net/strongswan/patches/201-kmodloader.patch</a> to address this, but with the new version the src/starter/netkey.c is no more so this doesn't apply anymore, where on 5.8.0 in sources could this be addressed ?	

### History

#### #1 - 31.05.2019 10:12 - Lucian Cristian

<https://github.com/openwrt/packages/blob/21e989190e45d793d3d321539b5642a88637c498/net/strongswan/patches/201-kmodloader.patch>

#### #2 - 31.05.2019 14:09 - Lucian Cristian

turns out is not needed anymore, sorry for the noise, this can be closed

#### #3 - 03.06.2019 11:31 - Tobias Brunner

- Status changed from New to Closed

- Resolution set to No change required
