

strongSwan - Bug #3448

network manager GUI too tall

| Target version: | 5.9.0 | | |
| Affected version: | 5.8.4 | | |
| Description | | | |
| Hi folks, there is a problem with the new network manager applet 1.5.1: Its too tall to fit on my screen (1600x900, which is not that uncommon for a laptop). [OK] and [Cancel] buttons are below the bottom edge of my screen. Desktop is xfce4. Setting a custom font size and reducing icon size doesn't seem to help. The font is smaller, but the general layout of the GUI has the same size. Do you think it would be possible to move the cipher proposals to an "advanced" menu tab? Suggesting ciphers surely is. Associated revisions

Revision 7b15ecf8 - 19.05.2020 16:17 - Tobias Brunner

nm: Use tabs for options/proposals to save screen space

The height of the dialog increased due to the recently added additional fields for certificate selection and identities. On some screens the fields to configure custom proposals were not visible anymore. Together with less spacing on the top level GtkBox this change reduces the height by about 80 pixels.

Fixes #3448.

Revision 1ebf63b9 - 19.05.2020 16:17 - Tobias Brunner

nm: Move server port to options tab and position tabs to the left

Also shortened the title of the proposal tab. This saves some additional screen space.

Fixes #3448.

History

#1 - 18.05.2020 08:33 - Harald Dunkel

PS: Using Gnome the [Cancel] and [Apply] buttons are at the top edge of the GUI, but now the Cipher Proposals are below the bottom edge of the screen.

#2 - 18.05.2020 11:49 - Tobias Brunner

- Category set to networkmanager (charon-nm)

- Status changed from New to Feedback

In the *3448-nm-height* branch, I've moved the options and proposals into tabs (GtkNotebook), which reduces the height by 80 pixels. Let me know if that works for you.

#3 - 18.05.2020 16:14 - Harald Dunkel

Much better now, but the buttons are only partially visible, still. They are covered by the xfce panel at the bottom edge. If I move the GUI to the top right corner, then there is no problem. I can live with that.

Using Gnome the Apply button is at the top. The ESP cipher proposal is only partially visible. Its covered by the systray. Trying to move the window up a little bit further I managed to move the window beyond to top edge somehow, making the Apply & Cance button unavailable, as well as the window decorations. Surely a bug in Gnome. There was no way to get rid of it but brute force.

#4 - 18.05.2020 18:17 - Tobias Brunner

I guess we could save some more space by moving the server port to either a new advanced options tab, or to the existing options tab while moving the tabs also to the left (the latter doesn't help with three tabs on newer Gnome version as the height three stacked tab buttons would exceed that of their contents). I pushed another commit to the branch that does the latter.

#5 - 19.05.2020 12:22 - Harald Dunkel

I really like the new GUI. Thanx very much

Do you think it would be OK to include this patch in Debian's network-manager-strongswan package (version 1.5.1)? Or should I wait with this for version 1.5.2?

#6 - 19.05.2020 16:28 - Tobias Brunner

I really like the new GUI. Thanx very much

Cool, thanks.

Do you think it would be OK to include this patch in Debian's network-manager-strongswan package (version 1.5.1)? Or should I wait with this for version 1.5.2?

I pushed the changes to master and released 1.5.2. Note that this also includes [73b60338dc](#), which renames NetworkManager-strongswan.appdata.xml to NetworkManager-strongswan.metainfo.xml and installs it in /usr/share/metainfo instead of /usr/share/appdata. I guess this has to be handled somehow in the Debian package during the package upgrade.
