

strongSwan - Issue #3464

Is it safe to upgrade from Ubuntu 18.04 TLS to 20.04 TLS

26.05.2020 18:32 - Tom Hsiung

Status: Closed	
Priority: Normal	
Assignee: Tobias Brunner	
Category: build	
Affected version: 5.6.2	Resolution: No change required
Description	
Hello,	
I just learned that Ubuntu 20.04 TLS had been released. However, some strongswan plugins has been removed from Ubuntu 20.04 TLS. So is it safe to upgrade from 18.04 to 20.04?	
Thank you	
Tom

However, some strongswan plugins has been removed from Ubuntu 20.04 TLS. So is it safe to upgrade from 18.04 to 20.04?

I guess that depends on whether you need the *eap-peap* or *eap-dynamic* plugin right now, and whether you intend to issue certificates via [pki](#) ([#3249](#)). The plugins will soon be available anyway (see [this issue on launchpad](#)) and the certificate/pki issue should be fixed then too (see [this issue](#)).
