

strongSwan - Issue #3660

The deficit of IKEv2 on information about traffic

19.12.2020 10:24 - Tom Hsiung

Status: Rejected	
Priority: Normal	
Assignee: Noel Kuntze	
Category:	
Affected version:	Resolution: Invalid
Description Hey, This is for Mac desktop only. I don't know the result on Windows of Linux desktops. Two screenshots explained what I intent to clarify. Is it possible to display the "sent" and "received" for strongSwan connection too? If it is a deficit, please make gain-of-function happen in future. Thank you. IKEv2 connections 72496020170915-4-8mk0sm non-IKEv2 connections =07.jpg	

History

#1 - 20.12.2020 02:46 - Noel Kuntze

- Status changed from New to Feedback

Hi, isn't that the Mac OS integrated client? If that is the case, we can't do anything about it.

#2 - 21.12.2020 08:44 - Tom Hsiung

That's correct. I have contacted Apple support for that. The estimated response would be next Sunday.

#3 - 21.12.2020 09:03 - Noel Kuntze

- Category deleted (osx)
- Status changed from Feedback to Rejected
- Assignee set to Noel Kuntze
- Affected version deleted (5.8.2)
- Resolution set to Invalid

I'm closing the issue then.

Rejected due to request being outside of project scope.
