

## strongSwan - Issue #512

### checksum.so regen doesn't work

10.02.2014 01:47 - Jonathan Davies

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Tobias Brunner	
<b>Category:</b> build	
<b>Affected version:</b> dr rc master	<b>Resolution:</b> No feedback
<b>Description</b> So, per the solution on <a href="#">#491</a> , I have this in my debian/rules file.  <pre>override_dh_strip:     dh_strip --dbg-package=strongswan-dbg     # Regenerate checksum.so after dh_strip for integrity checking.     make -C src/checksum clean install DESTDIR=\$(CURDIR)/debian/tmp/</pre>	
However, looking at the attached build log file, this doesn't seem to have an affect - both checksum runs have the same numbers.	
<b>Related issues:</b> Related to Bug #491: dh_strip breaking integrity test checksums <span style="float: right;"><b>Closed</b>    <b>17.01.2014</b></span>	

#### History

Apparently, make install is called with /tmp/build/strongswan-5.1.2~dr3+git20130120/debian/tmp/ as DESTDIR.

Before running dh\_strip, dh\_install is executed and this seems to copy the built files for each package to /tmp/build/strongswan-5.1.2~dr3+git20130120/debian/<package-name>/.

I guess these are then the directories dh\_strip operates on.

So unless you can change the order (i.e. let dh\_strip run before dh\_install - perhaps via --after/--before/--remaining/--until options? - so it operates on the original build directory, if it is at all able to do so) this won't work. So you probably have to either disable the integrity checks (not sure if they add that much value, as something similar could be achieved via e.g. debsums), or don't call dh\_strip at all.
