

strongSwan - Bug #62

ikev2 missing rekeying support not recognised

18.09.2008 01:34 - Martin Willi

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Martin Willi	Estimated time:	0.00 hour
Category:	charon	Resolution:	
Target version:	4.2.9		
Affected version:	5.9.2		
Description			
<p>When talking to a peer that does not support rekeying, charon fails to act correctly when receiving a NO_ADDITIONAL_SAS notify payload. Debug output reports that such packets(IKE_REKEY response with single NTFY payload) are discarded because of missing payloads(SA,KE,AUTH).</p> <p>The correct handling would be to cancel the scheduled rekeying attempt, negotiate a new IKE_SA + Child_SAs and delete the old ones once expired or new ones are established.</p>			

History

#1 - 24.10.2008 10:21 - Martin Willi

- Status changed from New to Assigned

#2 - 14.11.2008 15:17 - Martin Willi

- Status changed from Assigned to Closed

- Affected version set to fixed

Fixed for IKE_SA rekeying r4658 and CHILD_SA rekeying r4659.
