Target version:			
Resolution:	Fixed		
Description			
<p>i have here an remote host where the default udp ports (500+4500) are allready used for another ipsec solution.</p> <p>this setup works very well with native strongswan and the use of "left/rightikeport".</p> <p>it would be great to add an option to the strongswan app to! :-)</p> <p>the easiest solution would be extending the "gateway" field in the app with the classical A.B.C.D:YYYY syntax.</p> <p>tanks!</p>			

Associated revisions

Revision f14feed0 - 28.07.2015 13:55 - Tobias Brunner

Merge branch 'android-updates'

Fixes the roaming behavior on Android 5+, a linker issue on Android M, a few bugs, and adds several new advanced options for VPN profile (MTU, server port, split tunneling).

Also adds methods and a constructor to parse settings_t from a string instead of a file.

Fixes #782, #847, #865.

History

#1 - 07.07.2015 17:01 - Tobias Brunner

- Status changed from New to Closed
- Assignee set to Tobias Brunner
- Resolution set to Fixed

The next release of the app will provide an option to specify the server port (see *android-updates* branch).
