Description

Strongswan 5.3.2 build fails on FreeBSD due to undefined symbol UINT16_MAX in src/stroke/stroke.c and src/starter/starterstroke.c

I added the declarations to the patch to fix it - <https://bz-attachments.freebsd.org/attachment.cgi?id=157553>

Looks like the culprit is [d8fe354a0e3a41d7d400a44fd2865312782db5df](https://github.com/strongswan/strongswan/commit/d8fe354a0e3a41d7d400a44fd2865312782db5df)
